Community Dashboard

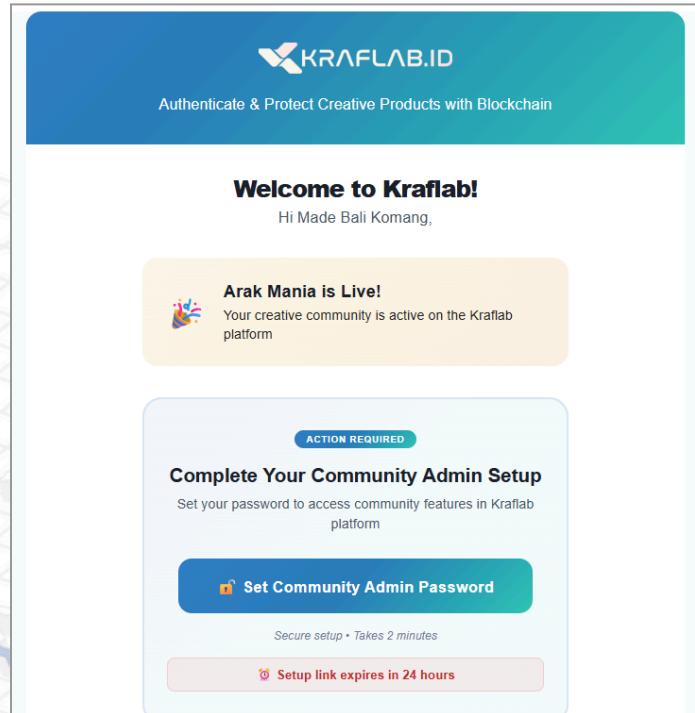

Community Dashboard serves as a **central hub for community members to manage and oversee the verification process of creators' products**. Through this dashboard, **community admins can review, verify, approve, or reject product submissions based on established standards of authenticity and data completeness**. The dashboard provides management tools for products in various stages: Pending (under verification), Verified (approved), and Rejected, ensuring that product quality and credibility are well maintained.

Registration Account — Community Web Dashboard

Currently, the creation of community accounts is fully managed by the **Organization Admin**, who is responsible for **registering communities by completing all required data, including the community's email address**.

However, for the community account activation process, **ensure that the registered email is active and used by the Community Admin**.

After the Organization Admin completes the registration, the **Community Admin will receive an email from Kraflab** containing a link to **set their password**, as shown in the example image below:

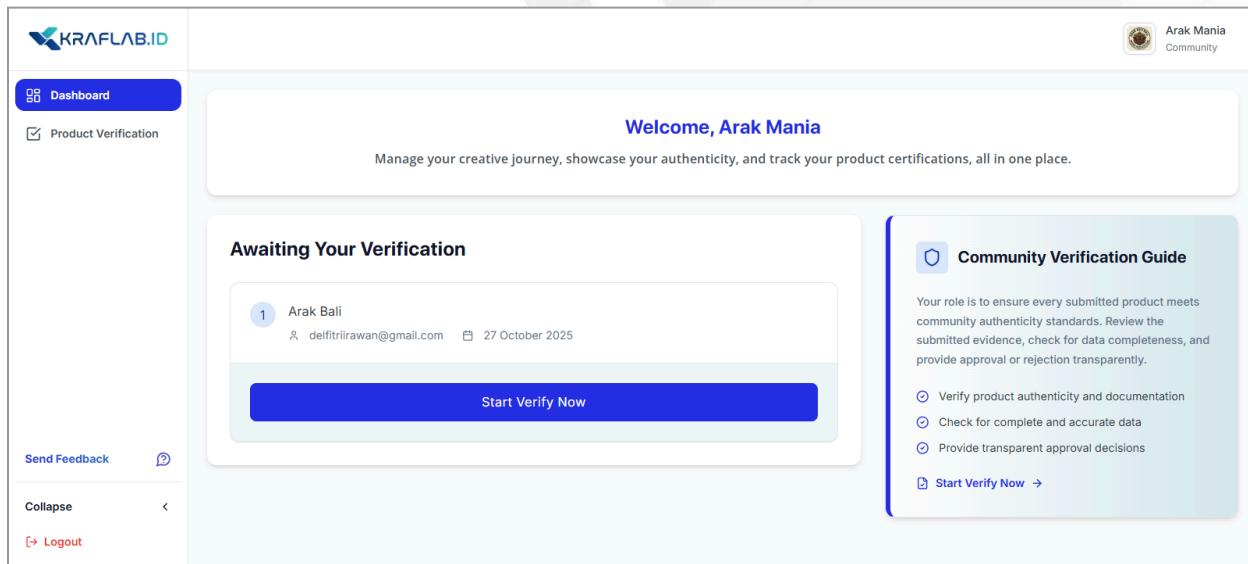

After the **Community Admin** successfully sets their password via the activation link sent, **the community account can be used to log in on the Community Login page**. This allows the Community Admin to fully access and manage the various features available within the Community Dashboard.

! Important Note

- **The password setup link is valid for 24 hours and must be used promptly.**
- **The activation email is sent to the community email address registered by the Organization Admin.**

Dashboard

The screenshot shows the Kraflab.ID dashboard interface. At the top, there is a header with the KRAFLAB.ID logo and a user profile for 'Arak Mania' (Community). The left sidebar includes a 'Dashboard' button (which is highlighted in blue), a 'Product Verification' button, a 'Send Feedback' button, a 'Collapse' button, and a 'Logout' button. The main content area starts with a 'Welcome, Arak Mania' message and a sub-instruction: 'Manage your creative journey, showcase your authenticity, and track your product certifications, all in one place.' Below this is a section titled 'Awaiting Your Verification' which lists one item: 'Arak Bali' (by delfitirawan@gmail.com, submitted on 27 October 2025). A large blue 'Start Verify Now' button is present. To the right, there is a 'Community Verification Guide' box with instructions: 'Your role is to ensure every submitted product meets community authenticity standards. Review the submitted evidence, check for data completeness, and provide approval or rejection transparently.' It lists three tasks: 'Verify product authenticity and documentation', 'Check for complete and accurate data', and 'Provide transparent approval decisions', each with a small icon. A blue 'Start Verify Now →' button is also in this box.

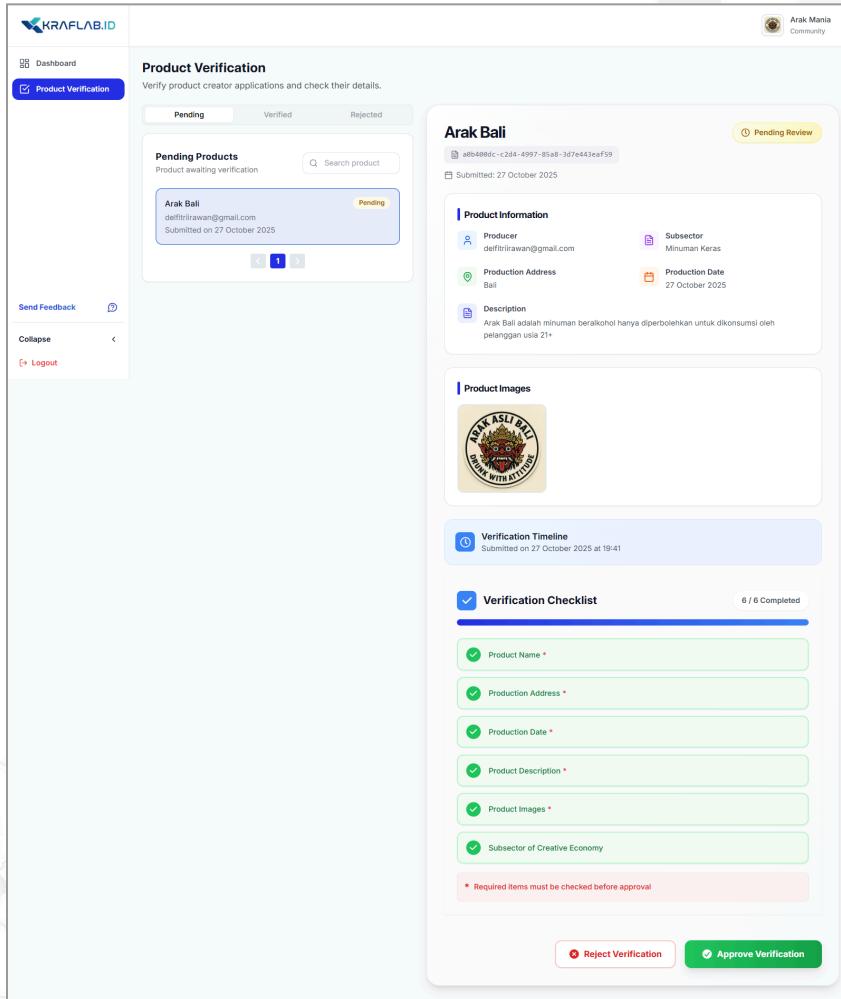

Dashboard is the main page that appears after you log into the system. **The Community** role is specifically designed to facilitate the verification and supervision process of products within the community. This dashboard helps ensure the quality and authenticity of products submitted by community members.

This page displays a list of products or submissions awaiting your verification as a community member. Each item shows brief information such as the product name, sender's email, and submission date. A "**Start Verify Now**" button is available to immediately begin the product authenticity verification process.

Product Verification

The Product Verification page is a key feature for community members responsible for **verifying products submitted by creators**. This page enables systematic and structured management and oversight of the product validation process. There are three main tabs on the Product Verification page, as follows:

Pending

The screenshot shows the Product Verification interface. On the left, a sidebar has a 'Pending' tab selected. The main area displays a product titled 'Arak Bali' with the following details:

- Product Information:**
 - Producer: delfitirawan@gmail.com
 - Subsector: Minuman Keras
 - Production Address: Bali
 - Production Date: 27 October 2025
 - Description: Arak Bali adalah minuman beralkohol hanya diperbolehkan untuk dikonsumsi oleh pelangganan usia 21+
- Product Images:** Shows a circular logo with the text 'ARAK ASLI BALI' and 'BALI WITH ATTITUDE'.
- Verification Timeline:** Submitted on 27 October 2025 at 19:41.
- Verification Checklist:** 6 / 6 Completed. The checklist items are:
 - Product Name *
 - Production Address *
 - Production Date *
 - Product Description *
 - Product Images *
 - Subsector of Creative Economy

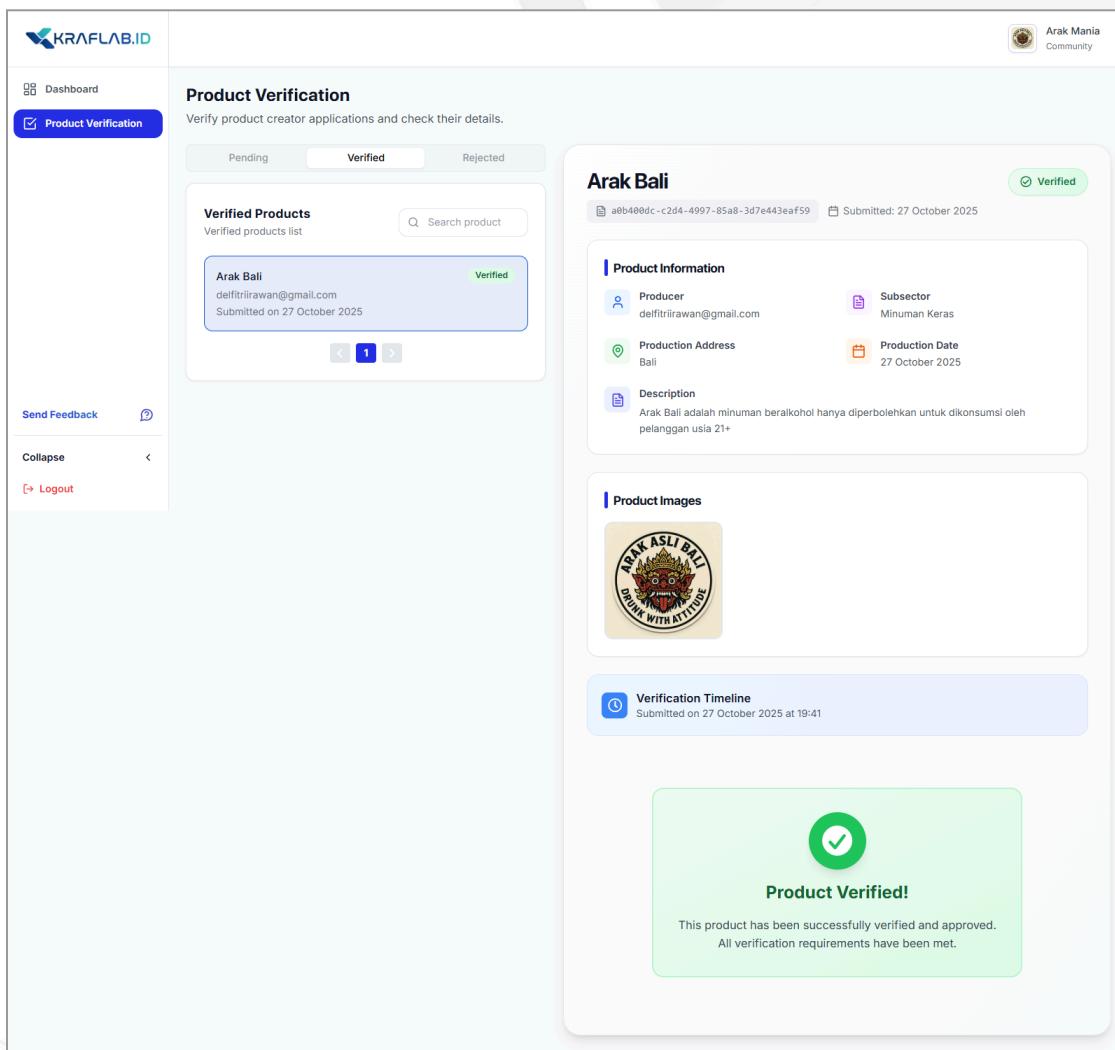

* Required items must be checked before approval

At the bottom are 'Reject Verification' and 'Approve Verification' buttons.

Tab Pending Products displays a list of products **awaiting verification**. As a community admin, you can access each newly submitted product to conduct a thorough verification process. Each product comes with a **verification checklist** that must be carefully reviewed to ensure data completeness and accuracy.

After reviewing, click **Approve Verification** if all data is complete and meets the established standards. Conversely, click **Reject Verification** if there are deficiencies or discrepancies that require further correction.

Verified

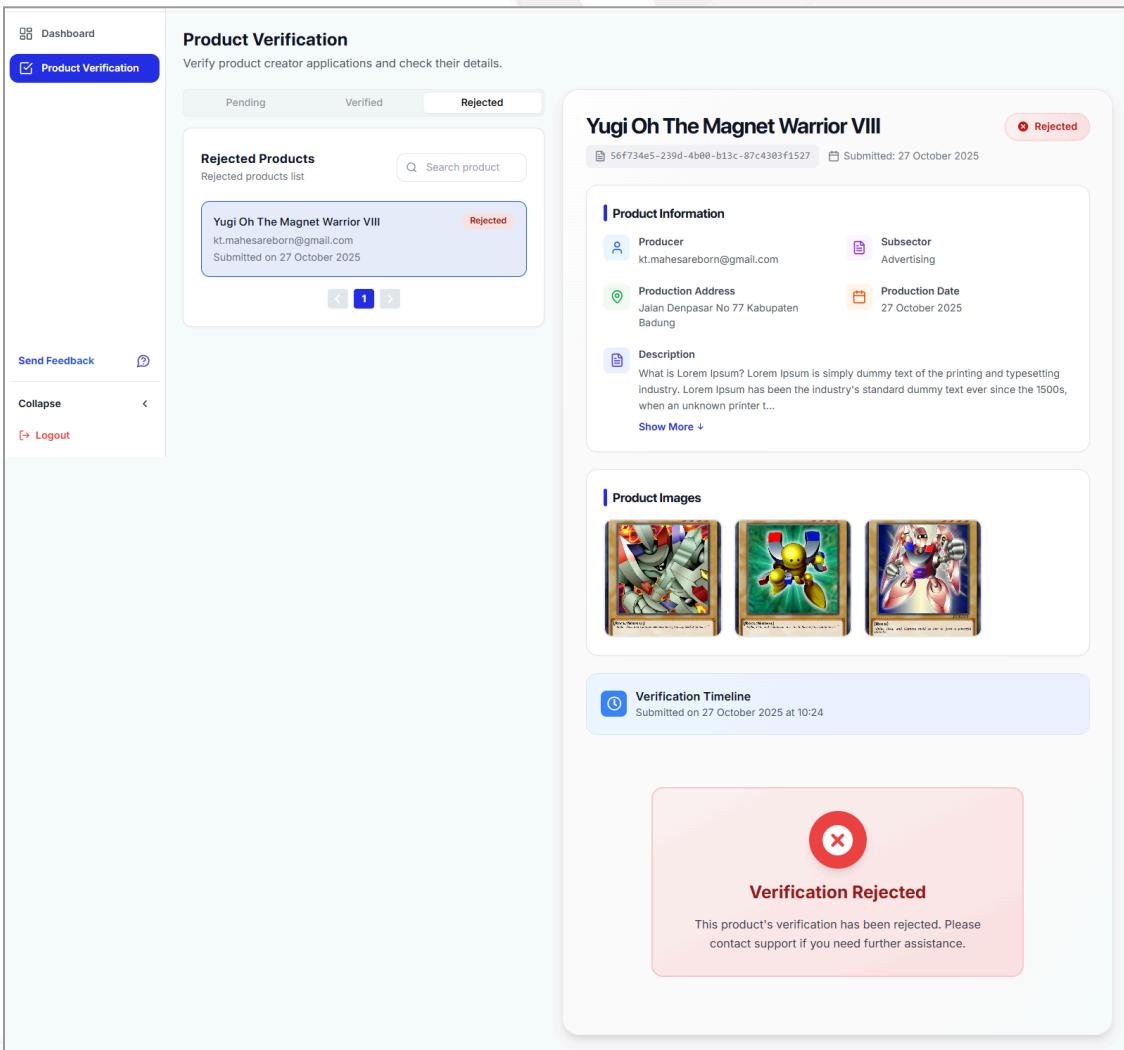

The screenshot shows the Kraflab.ID Product Verification interface. On the left, a sidebar has 'Dashboard' and 'Product Verification' (which is selected and highlighted in blue). Below that are 'Send Feedback', 'Collapse', and 'Logout'. The main area is titled 'Product Verification' and shows a 'Verified Products' list with one item: 'Arak Bali' by 'delfitirirawan@gmail.com', submitted on 27 October 2025. The product detail page for 'Arak Bali' includes sections for 'Product Information' (Producer: delfitirirawan@gmail.com, Subsector: Minuman Keras, Production Address: Bali, Production Date: 27 October 2025), 'Description' (Arak Bali adalah minuman beralkohol hanya diperbolehkan untuk dikonsumsi oleh pelanggan usia 21+), 'Product Images' (a logo for 'ARAK ASLI BALI DRINK WITH ATTITUDE'), and 'Verification Timeline' (Submitted on 27 October 2025 at 19:41). A large green box at the bottom right says 'Product Verified!' with a checkmark icon, stating 'This product has been successfully verified and approved. All verification requirements have been met.'

Tab Verified Products displays a list of products that have successfully passed the verification process and are confirmed by the community admin to meet all standards of authenticity and data completeness.

Displayed Information:

- **Product Information:** Presents key data related to the product, including:
 - **Producer:** Name of the product creator or maker
 - **Production Address:** The production site or location where the product was made
 - **Subsector:** Product category, such as alcoholic beverages
 - **Production Date:** The date the product was made, for example, October 27, 2025
- **Product Images:** Displays verified photos or logos of the product, providing an official visualization and facilitating product identification on the platform.
- **Verification Timeline:** Chronological information related to the verification process. This data helps track the verification history and ensures transparency in the product validation process.

Rejected

The screenshot shows the 'Product Verification' interface. On the left, a sidebar includes 'Dashboard' (blue), 'Product Verification' (selected, blue), 'Pending', 'Verified', and 'Rejected' (red). Below these are 'Rejected Products' (blue), 'Rejected products list' (blue), and a table for 'Yugi Oh The Magnet Warrior VIII' (blue). The table shows the product name, email (kt.mahesareborn@gmail.com), and submission date (Submitted on 27 October 2025). A 'Rejected' badge is present. On the right, the product details for 'Yugi Oh The Magnet Warrior VIII' are shown, including 'Product Information' (Producer: kt.mahesareborn@gmail.com, Subsector: Advertising, Production Address: Jalan Denpasar No 77 Kabupaten Badung, Production Date: 27 October 2025), 'Description' (Lorem Ipsum), 'Product Images' (three cards), and 'Verification Timeline' (Submitted on 27 October 2025 at 10:24). A large red box at the bottom right contains a red 'X' icon and the text 'Verification Rejected' with a note: 'This product's verification has been rejected. Please contact support if you need further assistance.'

Tab Rejected Products displays a list of products whose submissions were not approved during the verification process by the community admin. Products in this category have not met the standards of authenticity, data completeness, or other requirements set by the community.

Creators can review the details and documents of the rejected products, address the identified deficiencies, and **resubmit them for re-verification**.
